University of Minnesota Amplatz Children's Hospital

Convenient access to world-class care in more than 50 pediatric specialties

Exceptional Family-Centered Care

A commitment to caring for patients and families is the inspiration for the new University of Minnesota Amplatz Children's Hospital facility — opening in April 2011. The 227,000 square-foot facility is designed to meet the needs of patients and families, who will have access to:

- Private patient rooms – 65 percent larger than the national average
- A 24/7 pediatric-only emergency department
- A children's dialysis center (the only one in Minnesota)

World-Class Academic Medicine

University of Minnesota Amplatz Children's Hospital is Minnesota's only children's hospital that is part of an academic health center, and is home to one of the nation's top 20 pediatric research programs. Our physicians, nurses and researchers not only deliver the latest innovations, they create them.

Innovative Eco-Friendly Design

As Minnesota's first "green" children's hospital, the new facility will feature an environmentally sensitive design, eco-friendly materials and green spaces—including a healing garden. The facility will also feature a vast amount of natural lighting to help facilitate a safe healing environment for patients and families.

Comprehensive Pediatric Care

The new children's hospital will feature a pediatric-only emergency department with 10 treatment rooms and two trauma bays.

New facility opening in April 2011

University of Minnesota
Amplatz Children's Hospital

Our team of pediatric emergency physicians – subspecialty trained in pediatric emergency medicine and board-certified in pediatrics and pediatric emergency medicine – provide 24/7 care to children with common to complex medical conditions.

University of Minnesota Amplatz Children's Hospital is Minnesota's only children's hospital to offer immediate access to a full complement of pediatric-trained specialists in emergency medicine, critical care, neurosurgery, trauma surgery, orthopedics and more.

Medical Firsts

Innovative approaches and affiliation with the University of Minnesota has led to several medical firsts – saving the lives and enhancing quality of life for thousands of children in Minnesota and around the world.

- Performed Minnesota's first infant heart transplant
- Conducted Minnesota's first pediatric robotically-assisted surgical procedure
- Performed world's first bone marrow and cord-blood transplant to treat a rare skin disease
- Conducted Minnesota's first pediatric cochlear ear implant surgery
- Implanted the first Berlin Heart® device in a child awaiting transplant in Minnesota
